-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claim 13 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

I- Claim 13 recites the limitation "said hidden button" in 3. There is insufficient antecedent basis for this limitation in the claim.

### ***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 1-3,7-11,13-17,20 are rejected under 35 U.S.C. 102(b) as being anticipated by Maddox 6,390,329.

Maddox discloses an apparatus (10) for dispensing a measured quantity of fluid, which comprises an object sensor (42), a valve (32), a container (36), a dispense mechanism (28) coupled to the container to control an amount of fluid to be dispensed, a pump actuator (40), a hidden switch (168) carried by the container, wherein actuation

Art Unit: 3754

of the hidden switch enables a processor to enter an operational feature mode (col. 6, ll. 58-67, please note that the apparatus of Maddox has an inherently processor which activates and deactivates the motor and its associated components), a timer (col. 6, ll. 58-67 onto 7, ll. 1-10), at least one illuminating indicia connected to the processor wherein entry into the operational feature mode is indicated by the at least one illuminating indicia (col. 6, ll. 34-44), at least two lights (156,158,160).

***Claim Rejections - 35 USC § 103***

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 18-19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Maddox 6,390,329.

Maddox has taught all the features of the claimed invention except that the predetermined period of time is about 15 seconds and the predetermined number of dispense events is about 5, such represents an obvious matter of design choice to a person having ordinary skill in the art merely dependent upon the desired pouring characteristics or capabilities of the dispenser.

***Allowable Subject Matter***

7. Claims 4-6 are allowed.

8. Claims 12,21-24 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Conclusion***

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Mitchell et al. 6,209,752, Fender et al. 5,105,992 and Hoffman et al. 4,722,372 disclose other types of apparatus for dispensing a measured quantity of fluid.
